

Dear Birthparent,

Although we can't begin to understand the challenge you are facing, we know something about enduring a struggle.

Our struggle with infertility was difficult and unexpected, but it brought us closer as a couple and strengthened our faith.

Our longing to be parents led us to pursue adoption and we were blessed by the birth and adoption of our son Luke in 2015. We are overjoyed to be parents, have loved every stage of watching our son grow, and we cannot imagine our life without him.

We have wonderful memories of our own childhoods growing up alongside siblings, and have dreamed of providing our son siblings with the shared experience of adoption. We hope to grow our family further through a second adoption.

We want you to know that first and foremost your child will be loved and supported unconditionally throughout their life. We are committed to honoring an open adoption plan as we have with our first adoption.

We can't express our admiration for the courageous choice you are making, and we realize the blessing it would be to be chosen as adoptive parents.

Sincerely,

Luke & Stephanie

Our Love and Gratitude

We've been waiting and hoping for another child and a sibling for our son through adoption for many years. We want you to know, your child will be loved immensely, not just by us, but by his big brother and our incredible friends and family too!

Luke & Stephanie
