

hello

Dear Birth Mother ,

Thank you for taking the time to consider our family for your precious baby girl! We have a lot of love for you and baby. If you are reading this, **we admire you** so much for your bravery and strength that you are standing on and have already opened our hearts to you and your baby.

We are excited to potentially be a part of your story. As a family, we are dreaming about the day that we get to bring home the special baby that will complete our family. Please know we **respect your wishes** for openness you desire and will honor it. Although we are not in Indiana, we are a short drive away in the Midwest and visits are something we could easily do.

We want you to know if given the chance we would love this baby unconditionally. We would give her a **loving and stable home** to grow up in and provide her with **every opportunity** she desires. We would honor you and respect you as her birth mother. We would only speak highly of you in our family. She would have the love of 3 older siblings beyond excited to know her and explore the world side by side. She would also be joining a family that has an adopted 9 year old cousin, and your baby would be able to connect and be loved by her - she's very excited to have another adopted baby join the extended family! Our children are our whole world, and **we would feel beyond blessed** to love your baby girl just the same. Thank you again for considering our family, for opening your hearts to us and for loving your baby girl so well.

Steven and Brittney and family
